

Fellow racers,

The new barriers have arrived and we need your help putting them on the track this Saturday. This is our plan:

We will have a Bobcat with turf tires and a grapple on site that can grab multiple rows of tires in one shot and load them in a trailer. When the old tires are removed we need to weedwack and mow where the tires used to be. When it's all cleaned up we can place the new barriers.

So we need help with mowing, weedwacking, trucking tires to the field and placing the new barriers.

What to bring:

- Weed wackers, cutters
- Gloves
- We need 2 dump trailers with trucks to haul them
- lots of water

Obviously the track will be closed till this is finished. Depending on how much help we get we should be able to pull it off in one day.

We will start 8.30-9 am till done. You can sign up here:
